

KEERTHANA R

Software Engineer | Java, Spring Boot & Full-Stack Backend Development

Bengaluru, Karnataka, India | +91 76762 22059 | keerthi9643@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Java/Spring Boot developer with hands-on backend and microservice-style project experience (JWT security, REST APIs, MySQL, Docker CI/CD) and a 4-month internship covering the full software development life cycle, from requirement analysis through debugging and production support. Final-year MCA candidate, immediately available. Independently designed, tested, and deployed two production-style systems using object-oriented design principles: TaskFlow (24-test CI/CD pipeline) and MoodPlay (sub-300ms real-time inference).

EXPERIENCE

Software Engineering Intern — Glovish Technologies

01/2024 – 04/2024

IoT Smart Home Automation | Java, Spring-style REST APIs, MySQL, Git, Agile

- **Cut integration defects during QA by ~30%**, measured across sprint retrospectives, by owning root-cause diagnosis end-to-end and authoring API/deployment documentation adopted by the full team.
- **Architected Java backend services and RESTful JSON APIs** integrated with sensor/actuator hardware, enabling reliable real-time communication across IoT endpoints with consistent automated control-workflow execution.
- **Reduced recurring technical-support escalations** on hardware-integration issues, measured by fewer repeat tickets sprint-over-sprint, by independently troubleshooting and resolving moderately complex cross-stack defects in Agile sprint reviews.

PROJECTS

TaskFlow — Full-Stack Task Management Platform

03/2026

Java, Spring Boot, Spring Security, JWT, MySQL, Flyway, Hibernate/JPA, React.js, Docker, GitHub Actions | [Live Demo](#)

- **Automated build verification on every code push**, measured by 24 passing JUnit tests per run, by designing a GitHub Actions CI/CD pipeline integrated with Flyway-managed schema migrations.
- **Debugged and resolved recurring pipeline failures** — Flyway checksum mismatches, Spring Security 401/403 errors, stale Mockito mocks — through iterative hardening of the CI/CD configuration, eliminating repeat failures across subsequent runs.
- **Secured role-based API access** across Auth, Task, and Admin services, measured by zero unauthorized-access defects in testing, by implementing JWT authentication, BCrypt hashing, and Docker/Docker Compose deployment to Render.

AI-Driven Emotion-Adaptive UI (MoodPlay)

11/2025

React.js, face-api.js (TensorFlow.js), Spring Boot, REST API, JavaScript | [Live Demo](#)

- **Cut false-positive emotion classifications by ~40%**, measured against baseline face-api.js output, by tuning confidence-thresholding and temporal-smoothing in the CNN inference pipeline.
- **Optimized the React front end's session and event-logging integration** with Spring Boot REST APIs, achieving sub-300ms detection latency measured end-to-end from capture to UI update.

EDUCATION

Master of Computer Applications (MCA) — In Progress

01/2025 – 12/2026

Bangalore University, G.T. College, Bengaluru | CGPA: 8.18

- Final semester: internship (completed) and capstone project only — no further coursework, immediately available.

Bachelor of Computer Applications (BCA)

01/2022 – 11/2024

Bangalore University, Vasavi Jnana Peetha First Grade College, Bengaluru | CGPA: 8.92

CERTIFICATIONS & LEADERSHIP

- Full Stack Java Development Certification, JSpiders, 01/2023 – 01/2024 (Core Java, Spring Boot, Hibernate, SQL, JavaScript, React.js)
- Runner-up, Crackathon Inter-College Technical Competition, Surana College
- Executive Committee Head (Academics), coordinating academics for a 40+ student cohort

SKILLS

Languages & Fundamentals: Java, JavaScript (ES6+), Data Structures & Algorithms, Object-Oriented Design (OOD) & Design Patterns, Linux/Unix environments

Backend: Spring Boot, Spring Security, REST APIs, Microservices, Hibernate/JPA, JWT/RBAC

Frontend: React.js, HTML5, CSS3

Databases: MySQL, JDBC, Query Optimization, Indexing

Engineering Practices: Docker, Docker Compose, GitHub Actions (CI/CD), Git & IDE-Based Debugging Tools, Flyway Migrations, Maven, JUnit & Mockito, Agile/Scrum, Code Documentation
