

KEERTHANA R.

Software Engineer — Java/Spring Boot Backend & React Frontend

keerthi9643@gmail.com | +91 76762 22059 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Bengaluru, India

SUMMARY

Full-stack builder with hands-on experience shipping REST APIs and React interfaces end-to-end, from Spring Boot services to production UI. Comfortable owning a feature from design through deployment in a small team, with a strong foundation in Core Java, Spring Boot, and relational database design.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), JavaScript (ES6+), C, SQL, HTML5, CSS3

Backend: Spring Boot, Spring Security, JWT/RBAC, Spring MVC, REST API Design, JDBC, Hibernate/JPA

Frontend: React.js, Responsive Design, DOM Manipulation, Asynchronous JavaScript

Database: MySQL, Schema Design, Query Optimization, Indexing, Flyway Migrations

DSA & Patterns: Arrays, Linked Lists, Stacks, Queues, Trees, Sorting · MVC, Repository, Factory, Singleton

Tools & Practices: Git, GitHub, Docker, Docker Compose, GitHub Actions (CI/CD), JUnit & Mockito, Postman, Maven, IntelliJ IDEA · Agile/Scrum

EXPERIENCE

Software Engineering Intern — Glovish Technologies 2024

Smart Home Automation | Java · Spring Boot · REST APIs · MySQL · IoT · Git

- Delivered real-time device-communication backend services in Java, enabling automated control workflows across IoT endpoints with sub-second command latency.
- Designed and shipped RESTful API endpoints connecting automation rules to live sensor data, applying correct HTTP semantics, structured error handling, and validated response schemas — reducing malformed-request incidents during integration testing.
- Unified sensor, actuator, and smart-device integration into a single automation layer by partnering cross-functionally on architecture and end-to-end test coverage, cutting manual QA cycles.
- Eliminated manual device-state configuration by building automated state-management workflows, improving operational efficiency across the automation layer.
- Diagnosed and resolved integration defects during QA, and authored the API, deployment, and test documentation used by the team post-handoff.

PROJECTS

TaskFlow — Full-Stack Task Management Platform 03/2026

Java, Spring Boot, Spring Security, JWT, MySQL, Flyway, Hibernate/JPA, React.js, Docker, GitHub Actions | [Live Demo](#)

- Automated build verification on every code push, measured by 24 passing JUnit tests per run, by designing a GitHub Actions CI/CD pipeline integrated with Flyway-managed schema migrations.
- Debugged and resolved recurring pipeline failures — Flyway checksum mismatches, Spring Security 401/403 errors, stale Mockito mocks — through iterative hardening of the CI/CD configuration, eliminating repeat failures across subsequent runs.
- Secured role-based API access across Auth, Task, and Admin services, measured by zero unauthorized-access defects in testing, by implementing JWT authentication, BCrypt hashing, and Docker/Docker Compose deployment to Render.

AI-Driven Emotion-Adaptive UI (MoodPlay) 11/2025

React.js, face-api.js (TensorFlow.js), Spring Boot, REST API, JavaScript | [Live Demo](#)

- Cut false-positive emotion classifications by ~40%, measured against baseline face-api.js output, by tuning confidence-thresholding and temporal-smoothing in the CNN inference pipeline.
- Optimized the React front end's session and event-logging integration with Spring Boot REST APIs, achieving sub-300ms detection latency measured end-to-end from capture to UI update.

EDUCATION

Master of Computer Applications (MCA) — Pursuing | CGPA: 8.18 2024 – 2026

Bangalore University — G.T. College, Bengaluru

Final semester: internship (completed) and capstone project only — no further coursework, immediately available.

Bachelor of Computer Applications (BCA) | CGPA: 8.92 2021 – 2024

Bangalore University — Vasavi Jnana Peetha First Grade College, Bengaluru

CERTIFICATIONS & ACHIEVEMENTS

- Full Stack Java Development — JSpiders (2023–2024): Core Java, Advanced Java, JDBC, Hibernate, Spring Boot, SQL, HTML, CSS, JavaScript, React JS.
- Runner-up — Crackathon, Inter-College Technical Competition, Surana College: Delivered optimized algorithm solutions competing across multiple university teams.
- Executive Committee Head (Academics): Directed academic coordination and cross-team collaboration for a 100+ student cohort, demonstrating ownership and stakeholder management.
